MEMORANDUM FOR CHAIRMAN, SECOM COMPARTMENTATION SUBCOMMITTEE

SUBJECT: Review of Foreign Travel Policy - DCID 1/20 (U)

1. (C) Army policy and procedures for foreign travel of personnel having SCI access are based on DCID 1/20 and implemented by DA policy message, DTG 061400Z Dec 78 (enclosure 1).
2. (C) This policy states that persons planning unofficial travel to hazardous areas who have been granted access to extremely sensitive information or knowledge (ESK) on foreign intelligence sources and methods of SCI must have official approval for the trip from the SOIC. Examples of ESK are specific and extensive information on the technological structure, function, and techniques of SCI collection or exploitation methods; degree of success of collection or exploitation system; collection or exploitation system/methods capabilities and vulnerabilities. In addition, all persons with SCI access who plan unofficial travel to the designated hazardous areas must give advanced notice of planned travel, obtain a defensive security briefing, and report upon return to their SOIC any incidents of potential security concern. It is also national policy that persons with access to SCI who are conducting official travel will receive the defensive security briefing prior to entry into hazardous areas.
3. (C) Recently, the Army has initiated improvements in the administration of this travel policy to insure that the intent and spirit of DCID 1/20 are carried out throughout the Army. These measures:
  - a. classify all personnel of OACSI and its field operating agencies as possessing extremely sensitive knowledge (ESK) and prohibit their travel to hazardous areas without prior written approval of the ACSI,
  - b. require all personnel assigned to HQDA possessing SCI accesses to notify by phone or in writing the local SSO of plans for foreign travel. The purpose of this is (1) to alert them to the current hazardous areas as these are changed and updated at regular intervals, and (2) schedule them for a defensive security briefing if the planned travel is to a hazardous area, and
  - c. identify other than OACSI positions in HQDA who have ESK access. OACSI procedure will be expanded to include all HQDA positions possessing ESK access. This will be followed by implementation worldwide.

ARMY review(s) completed.
